OVERVIEW

A final-year IT student at FPT Polytechnic with a strong foundation in Java development. Proficient in building scalable web applications using Spring Boot, PostgreSQL, and RESTful APIs. Passionate about solving complex problems and eager to contribute to real-world projects. Looking for a Java Intern opportunity to apply my knowledge in a dynamic development team.

EDUCATION

FPT Polytechnic College – Can Tho Campus

Major: Software Development (2023 - Present)

GPA: 3.75 / 4.0

SKILLS

Technical Skills

- Frontend
 - HTML/CSS/JS
 - React, Next.js, TailwindCSS, Bootstrap 5
- Backend
 - Java (Spring Boot), Node.js, WebSocket
- APIs
 - RESTful APIs
- Database
 - PostgreSQL, SQL Server, MongoDB, Supabase
- Tools
 - Git, VS Code, Jira, Trello, Postman
- AI-powered Coding Assistance
 - Grok 3, ChatGPT, Gemini, DeepSeek
 - Github Copilot, AI Assistant

Soft Skills

- Analytical & Problem-Solving
- Team Collaboration & Communication
- Time Management & Adaptability
- Playing Sports (e.g., football, badminton, ...)

PROJECTS

UNIFY | Web Application | Social Media Platform | Team Project

07/01/2025 - Present

- **Description:** A social media platform that enables users to connect, post updates, comment, chat, and make video calls in real-time.
- **Team size:** 5 members.
- **Technologies:** Next.js, TailwindCSS, Java Spring Boot, JWT Authentication, PostgreSQL, MongoDB, Supabase, WebSocket.
- **Role & Contributions:** I developed the **user management system**, implementing **automated bans** based on user reports. I also built the **Explore page, notifications system, and key user interactions** (follow, like, share). Additionally, I optimized the frontend, improving page load speed by **30%** for a better user experience.
- **Github link:** github.com/v06012005/UNIFY

The Bookstore | Desktop Application | Team Project

- **Description:** A desktop application for managing book sales, allowing users to search for books, select them for business, and efficiently manage invoices.
- **Technologies:** Java FX, JavaSE, SQL Server
- **Team size:** 5 members
- **Role & Contributions:** I developed the **supplier and product management system**, enabling efficient tracking and organization. Additionally, I implemented a **search functionality** to help users quickly find products. I also contributed to designing the **user interface (UI/UX)** using JavaFX and integrated **SQL Server** for data storage. These improvements enhanced system efficiency and user experience.
- **Github link:** github.com/v06012005/DuAn1

AltF4 | Web Application | Online Learning | Personal Project

- **Description:** I implemented **course registration, lesson management, and assignments**, enabling seamless learning experiences. I also developed a **role-based access control system**, ensuring only registered students could access video lectures, and designed RESTful APIs for smooth system integration.
- **Technologies:** Java EE (Servlet, JSP, EJB), HTML/CSS/JS, SQL Server
- **Github link:** github.com/anninh230705/AltF4
